Sharp

Flexible. Scalable. Efficient.

Introducing Clinteract, the complete Clinical IRT Solution.

Sharp has developed a suite of IRT solutions that are designed to be **flexible, scalable** and **efficient**. Managing everything from patient randomization and real-time drug allocation to dynamic drug supply forecasting and reporting.

Clinteract
Powered by **Sharp**

With many configurable modules, Clinteract gives you a comprehensive platform to manage all aspects of your trial, including:

Subject Enrollment, Randomization and Drug Dispensing
Clinteract forms can be configured to capture any trial data items required for screening, randomization and other trial visit activities. Your trial data can also integrate with EDC and other connected eClinical systems.

Some of the enrollment options in Clinteract include:
- Static Blocked (fixed block size)
- Static Blocked (random block size)
- Minimization (Pocock and Simon)

In addition to enrollment, Clinteract offers:
- Double randomization
- Stratification
- Cohort management
- Direct-to-Patient capabilities

Reports, Data Deliverables and Data Integrations
At Sharp we have extensive experience in reporting and integrations. Adding new custom reports to your system is fast and easy using our sinterface so you can get the most value out of your IRT data.

Introducing Clinventory, our real-time Inventory Management Solution.

Every clinical study is different, so Sharp has developed a stand-alone inventory management solution that can be tailored to you. You may not need all the tools to handle complex patient randomizations but instead, you want the efficiency and visibility that an inventory management system can bring.

Clinventory
Powered by **Sharp**

Why automate your inventory control with Clinventory?

Clinventory is designed to provide you with full visibility of stock levels at investigator sites ensuring you have a comprehensive view of your trial in real-time. Visibility leads to **better** supply efficiencies by improving the drug management process. Automation increases reliability and reduces the cost associated with manual processing.

IMS

Some key benefits of Clinventory

- When **shipment requests** are made, they are visible and notified to all users
- Clinventory will **automatically match** the inventory request to the distribution facility
- Alerts can be set to notify users of **overdue shipments**
- Clinventory can be configured to **trigger automatic resupply** when stock reaches defined levels
- Users can set automatic **expiry management**, setting rules to 'do not ship' and 'do not count'

Clinventory also offers real-time clinical data management, reporting and data integrations, including SAP to IRT systems.

2. Order Fulfillment
API/SFTP/PDF

1. Shipment Request
Manual or Automatic

3. Order Dispatch
'In-transit'

INVENTORY MANAGEMENT SYSTEM

Sharp

5. Material Management
Dispensed, Invalidated, Quarantined, Available, Destroyed

4. Order Receipt
Available, Invalidated or Quarantined
